REFRACTION POLICY

During your exam the doctor will need to perform a test called a refraction. A refraction is the test that the doctor performs to determine your vision. It is used to diagnose certain eye conditions. It also allows us to see what lens you will need for prescription glasses and for cataract surgery (if scheduled for surgery). This process is generally not covered by insurance. Unfortunately, we will have to pass the cost to you, the patient, and request that the fee be paid at the time of your visit. Our fee for the refraction test is \$50.00

I have read and understand the office policy on refraction. I also understand that this policy will apply to all my future visits.
